The background is a dark charcoal grey. It features three large, stylized triangular shapes made of two overlapping triangles each. One is in the top right, one in the bottom left, and one in the bottom center. The overlapping triangles are in shades of teal and turquoise. A large white number '2' is positioned in the center-left area.

PART TWO

About Project

About Project :

TITLE:

CAKE MASTER MANGEMENT SYSTEM

Working of the Project :

Cake Master works by making cake ordering and management simple for both customers and admins. Customers can look at the catalog, customize their cakes, place orders, track delivery, and make payments easily. Admins can manage customer accounts, update the catalog, handle orders, and check sales reports. The system makes everything faster, reduces mistakes, and saves time. It helps both customers and admins have a smooth and hassle-free experience.

The background is a dark charcoal grey. In the top-right and bottom-left corners, there are large, stylized triangles pointing towards the center. Each corner triangle is composed of two overlapping triangles of different shades of teal: a lighter, vibrant teal and a darker, muted teal. The text '3' is positioned in the center-left area.

Modules Description

Modules Description :

ADMIN MODULES:

- ❖ **Customer profile:**
Log in to for the account
- ❖ **Customer Access:**
View customer accounts , Update or delete customer profiles.
- ❖ **Catalog Management:**
Add new cakes Update cake details Remove cakes from catalog
- ❖ **Order Management:**
Track orders Update order status Cancel orders if needed
- ❖ **Financial Reporting:**
Generate sales reports By Update or cancel orders before finalizing
- ❖ **Discount Control:**
Create discounts for cakes and pastries Update discount terms
- ❖ **Delivery Control:**
Set delivery range ,Update delivery options

Customer modules:

❖ Customer Profile:

Sign up Log in

❖ Cake Catalog Browsing:

View cakes, See descriptions, sizes, and prices.

❖ Place Order:

Select cakes, Customize options ,Place orders.

❖ Order Tracking:

View order status , Update or cancel orders before finalizing

❖ Delivery Tracking:

Enter address ,Set delivery time, date, and day preferences

❖ Payment Options:

Choose Easy Paisa Select cash on delivery

❖ Feedback and Ratings:

Submit reviews Rate products and delivery

The background is dark gray with three large teal triangles. One triangle is in the top right corner, pointing downwards. Another is in the bottom left corner, pointing upwards. The third is in the bottom right corner, pointing upwards. The number 4 is centered on the left side of the slide.

PART FOUR

Data Structure used:

Data structure used:

“link list”

Reason why we used it :

- The data structure used in our project is “link list”.
- **Flexible Size:** A linked list can grow or shrink as needed, so it works well if you don’t know how many cakes or orders there will be.
- **Easy to Add or Remove:** Adding or removing items in a linked list is simple and doesn’t require shifting other data around, unlike in an array.
- **Saves Space:** Linked lists only use as much memory as they need, so there’s no wasted space.
- **Handles Changes Well:** It’s easy to make updates to the structure if you need to, like adding special relationships between cakes or orders.

Conclusion :

“A Cake Master Management System (CMS) can streamline bakery operations by automating tasks like order taking, inventory management, and financial tracking. This leads to increased efficiency, reduced errors, and improved customer service. A CMS can also help in analyzing sales data to identify popular items and trends, aiding in better decision-making for the business.”..

THANKS
